

ENGINEERING SOLUTION, MECHANICAL & ELECTRICAL CONSTRUCTION

COMPANY PROFILE

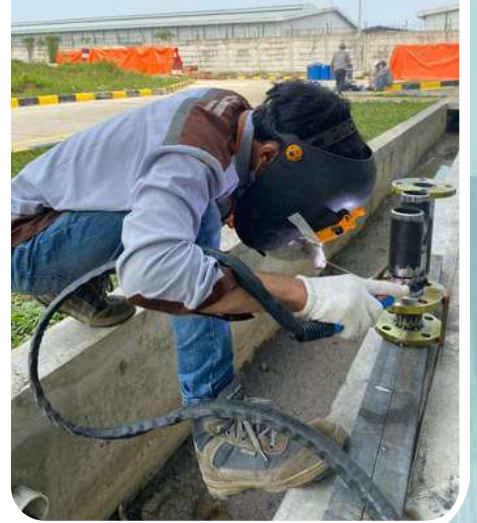

PT SABATANI GLOBAL SOLUSINDO

SAFETY & QUALITY

IS OUR PRIORITY

VISI & MISI

OUR VISSION

Priority Partner for Innovation and Improvement

OUR MISSION

To be The Best in Design and Built with quality

OUR CULTURE

Honest, Sincere, and Give

! With the best and professional team, we can help you to make equipment more effective with quality material & competitive price.

INTRODUCTION

PT Sabatani Global Solusindo as SABATANI is a full service engineering and mechanical & electrical construction at general industry. Product from Sabatani like a reactor tank, pressure vessel, storage tank, heat exchanger, piping system and complete package unit.

Taking advantage of its considerable experience, skilled labour and high technology equipment, Sabatani supplies high quality product and service. This is type of customer SABATANI.

- Chemical & Petrochemical
- Pulp and Paper Industry
- Mining & Ceramic Industry
- Food & Beverage Industry
- Pharmaceutical Industry
- Cosmetic Industry

In the meantime, we would like to assure you of our close attention to your requirement at all time.
Yours very trully,
PT Sabatani Global Solusindo

Paustinus Gunarto, S.T
President Director

Capability

ENGINEERING
SERVICE

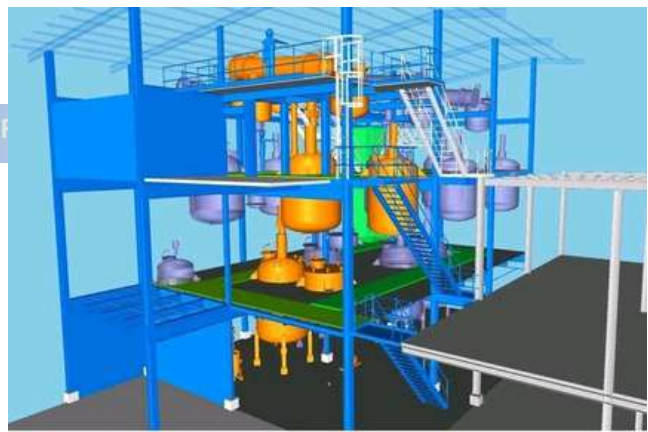

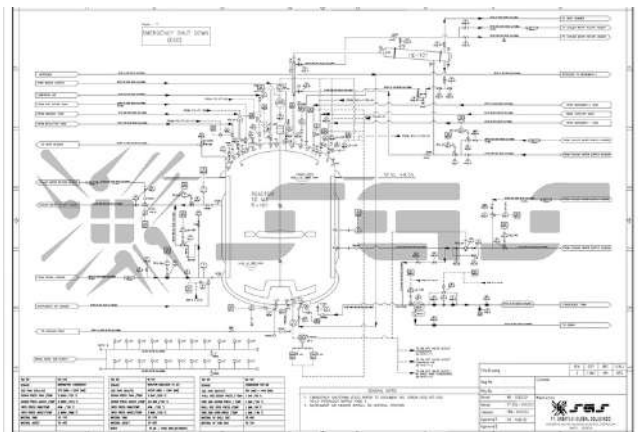

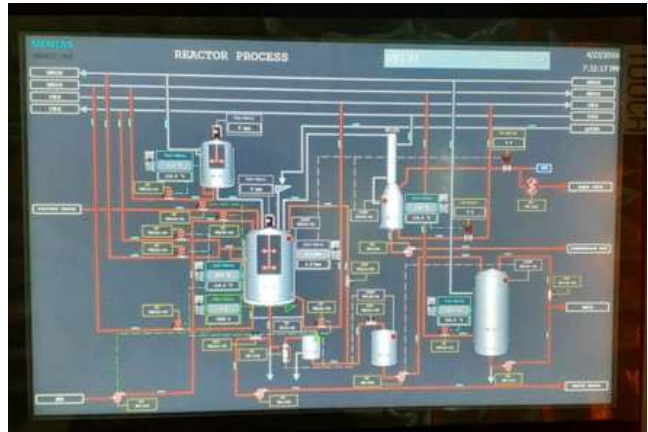

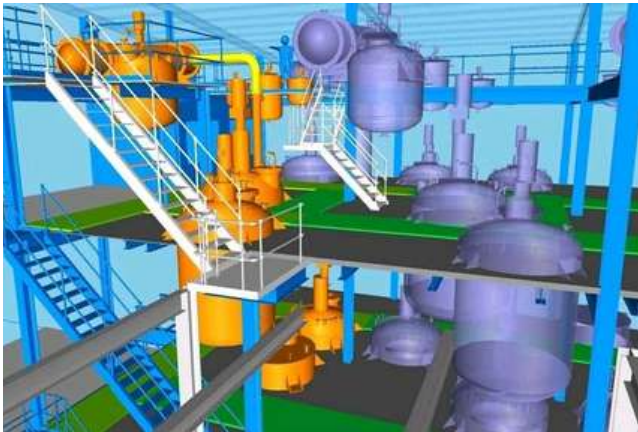

PROCUREMENT

FABRICATION

CONSTRUCTION/
INSTALLATION

Engineering Service

- Mechanical Calculation
- Piping & Equipment Layout in 3D
- Generate Isometric Drawing
- Provide Bill Of Quantity For Bid
- Expediting of Execution Project
- As Built Drawing

Engineering Team

- Mechanical Engineer
- Piping Engineer
- Drafter Engineer
- Electrical & Instrument Engineer
- Process Engineer
- Project Engineer

Project Team

Certification

- ISO 9001 : 2015
- ISO 45001 : 2018
- SKT Depnaker
- WPS & PQR
- BPJS

Our Team

- HRD
- General Affair
- Accounting
- Finance
- Marketing
- Engineering
- Purchasing
- QC
- Project
- Safety

Certification Personel

- Welder Certificate Depnaker
- Welder Certificate Orbital Welding
- Safety Officer Certificate
- Welding Inspector
- QC NDT Level 2
- Confined Space Certificate
- Electrical Technician Certificate
- TKBT 2 Certification (for Work at Height)
- PUBT Bejana Tekan or Pressure Vessel Lisence for Fabrication

Our Teams

FABRICATION WORK

SABATANI have a great team to make a best product. We have team with specialized job to provide a product. We have certified welder for produce some product. Safety and quality product is very important for SABATANI product.

SABATANI used a best material for make a product. We used good quality Stainless Steel and Carbon Steel material. Before fabrication material will be inspected by quality control to make sure quality of material.

Stainless steel and carbon steel material have a good quality for make a SABATANI product. For stainless steel we used SUS 304 until SUS 316L and for carbon steel we used SS400 until SA 516 Gr 70. Material grade depending on the needs or demand of the customer.

ADVANTAGES OF HIRING SABATANI SERVICES

- Professional Engineers
- Welding Specialist
- General Contractors
- Individualized Services
- Top Fabrication Equipment
- Sub - Contractor Sources

TURN KEY PROJECT

PROCESS PLANT

SABATANI have a customized product. When customer have some special inquiry we can customized as needed. Sabatani have team to develop new process plant with better efficiency for your company.

In addition to plant modification, SABATANI can help you to made new plant to produce something. With experience Sabatani team can help you to get better facility.

SABATANI customers are confident hiring our service thanks to our highly competent in-house engineering, and great team on field or management. All this combined with vast experience and dedicated management enables us to accomplish client goals.

SABATANI customers are confident hiring our service thanks to our highly competent in-house engineering, and great team on field or management. All this combined with vast experience and dedicated management enables us to accomplish client goals.

PAINT PLANT

INK PLANT

CHEMICAL PLANT

RESIN PLANT

SOLVENT BASE PLANT

AGITATOR

At general industries mixing process is very important for process production.

SABATANI have process engineering specialist in mixing system, know-how and vast experience at mixing system in chemical, food & beverage, petrochemical, flavor & fragrance and other industries.

SABATANI can support design, fabrication until commissioning the agitator. We can support analysis mixing system and reparation for existing agitator.

SABATANI will provide solution on problem in the mixing process customer. With experience and supported by specialist team we can help customers to achieve effective and efficient mixing process.

CONSTRUCTION & INSTALLATION

As EPC company SABATANI also provide construction and installation service. SABATANI have team for mechanical and electrical installation and for civil work we can provide to our partners and we act as project management.

On this technological age there is much need for factory development to add automation on the process equipment to improve the efficiency of the process. SABATANI also provide that improvement by supported team experienced in automation system.

SABATANI have an experience at many range of industry like a chemical, petrochemical until food industries.

PIPING INSTALLATION

Our skilled field personnel have vast experience at general industries and specialized on mechanical and piping construction. SABATANI can provide utility piping until process piping on your plant.

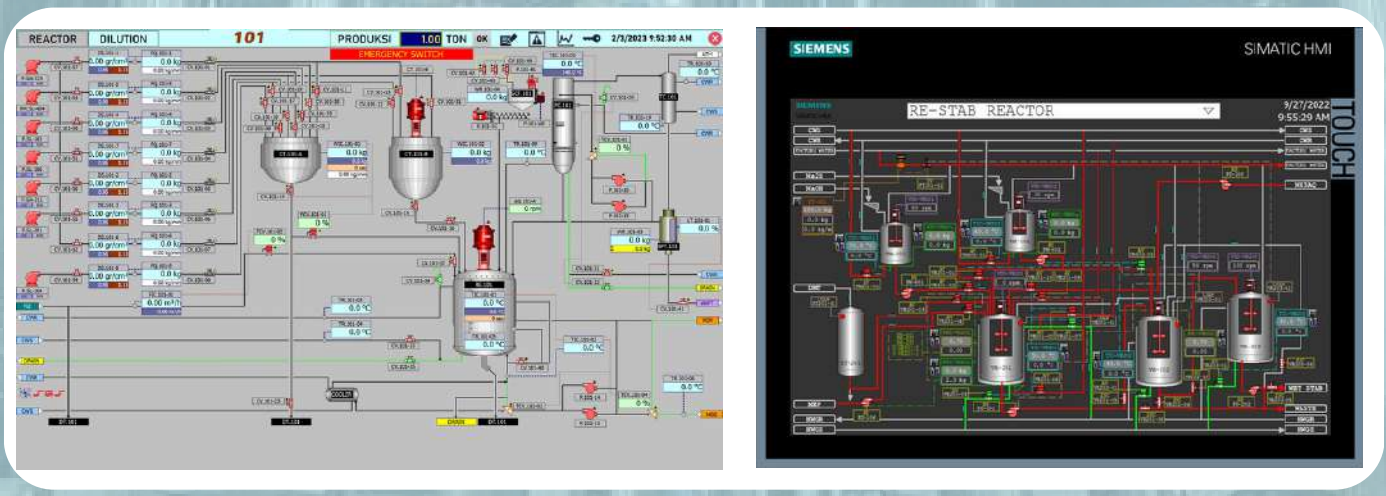

On project, time schedule is very important. SABATANI has developed schedule monitoring by online to get fast response on mitigation some problem in the project to make sure project on time with the best quality and safety. We ensure the highest level of asset integrity and reliability to our client.

ELECTRICAL INSTALLATION

SABATANI have a skilled field personil with vast experiance at many type of project. We have enhanced our culture and practices and dedicate time, resources and leadership to attract, develop and retain exceptional people. We inspire our employees to confidently and continuously share and improve their work experiances. We focus on team work as we believe this is core to Client service and deliverables.

INSULATION WORK

SABATANI provide full complete solution of hot / cold insulation services. Material and method selection is very important to get the best insulation and safety in work is our priority.

Our team have experience in working insulation tank until piping. For hot/ cold insulation we used material rockwool, calcium silicate, polyurethane and armafex. And we can fabricate cover from alumunium or stainless steel.

Our team is vast experienced in different area of project like in general industries. SABATANI used a best equipment and efficient method to ensure that the quality is delivered with minimum cost and on time.

HVAC DESIGN & INSTALLATION

SABATANI provide full complete solution engineering process, mechanical, electrical until HVAC system. Our design and build service HVAC system have been successfully implemented in many environment.

SABATANI developed a reputation within the industry for our complex design. We have partnered with the large refrigeration manufacturers for get update technology.

HYGIENIC TANK & MIXER

SABATANI have a business in all industrial sector, including hygienic industries and have experience in design and fabrication with hygienic standard (GMP, 3A and ASME-BPE). Many of our clients in the Food and Pharmaceutical industries specify hygienic fabrications for key elements of their work.

We specialist in this service, with engineers certified accordingly, to deliver crevice free welding and purged welds - sealing both sides of the joints. Profesional team will be make your project success.

STRUCTURAL WORK PLANT PROJECT

FOR PROJECT :

- 1. BUILDING FACTORY
- 2. PLATFORM
- 3. PIPE RACK
- 4. WAREHOUSE, ETC.

Condenser

Air Handling Unit

Skid Filter

Our Facility

SABATANI deliver good quality product using best equipment for fabrication stainless steel and carbon steel material.

Quality is first thing for SABATANI product. Examination of the quality of the material and result of the work is very deep attention to detail. Our team have special division to check the quality.

With great equipment and experienced personel, SABATANI can help client to get the best equipment for increased a efficiency process facility on plant.

Our Machinery

Our Machinery

Orbital Welding

Hoist Crane max. 5-10 Ton

PT. SABATANI GLOBAL SOLUSINDO

Measurement of concentration even for extreme requirements: **LiquiSonic®**

The sonic velocity can easily be calculated by measuring the travel time of the sonic signal, which can be realized very accurately and with long-term stability. The sensor firmware calculates the sonic velocity by using the known distance between the transmitter and receiver.

The typical sensor design includes transmitter and receiver within one rough construction.

Sonic velocity analyzers have no moving parts; therefore there is no long time degradation of their mechanical properties. Using this sensor technology, the user will have several advantages against competitive methods.

In liquids, we set the measure.

updating of measuring values up to every 250 ms

measuring accuracy up to ± 0.01 wt%

integrated temperature measurement

Real-time measurement results - reliable, robust and maintenance-free

- measurement is independent of the color, conductivity and transparency of the process fluid
- high, drift-free measuring accuracy even at high proportion of gas bubbles
- installation directly in pipelines or vessels
- bypass-free installation
- robust sensor design without gaskets or moving parts
- maintenance-free measurement technology
- insensitive to contamination
- use at temperature from -90 °C to 200 °C
- use at pressure up to 500 bar
- use of special sensor materials in corrosive liquids
